

Certified layers versus empirically non-inferior layers

A · hard box

0 → 1

certified → held-out

0 → 1

certified → held-out

0 → 1

certified → held-out

B · finite Gaussian

0 → 1

certified → held-out

0 → 2

certified → held-out

0 → 2

certified → held-out

M=8

M=16

M=32

Frozen 0.10 non-inferiority margin; every cell used eight held-out N values
